PROFESSIONAL SUMMARY

Software Developer with strong backend and full-stack experience in TypeScript, Node.js, and AWS, supporting and extending production systems in agile environments. Experienced in building and maintaining APIs, working with relational databases, and troubleshooting complex applications in high-compliance environments (NASA). Known for writing clean, maintainable code, collaborating across teams, and quickly learning new technologies to support evolving system architectures.

EXPERIENCE

Astrion / NASA - Mountain View, CA
Software Developer

04/2024 - 03/2026

- **Backend & API Development:** Built and maintained a TypeScript and Node.js backend supporting a React-based risk management platform, developing and integrating RESTful APIs to enable NASA teams to track and manage program risks.
- **System Maintenance & Enhancement:** Maintained and extended existing applications, troubleshooting production issues, improving system reliability, and adapting features based on evolving stakeholder requirements.
- **Data & Integration Work:** Worked with structured data and backend services to support reporting and analytics, integrating Power BI dashboards and ensuring accurate data flow across systems.
- **Office-Based Engineering (Relevant Signal):** Engineered and maintained a C# VSTO add-in for Microsoft Office, working with structured document data and enabling program managers to generate reports, perform schedule analysis, and manage resources.
- **Debugging & Code Quality:** Identified and resolved software defects, contributed to clean and maintainable codebases, and supported system stability in a high-compliance environment.
- **Collaboration & Agile Workflow:** Worked in Agile (Scrum) teams using Git-based workflows, collaborating with cross-functional stakeholders to deliver incremental improvements and system updates.

SKILLS

- **Web Development:** React, REST, APIs, JSON, Express.js, Node.js, HTML, CSS, JavaScript, Web Frameworks
- **Database & Architecture:** SQL, MySQL, Dataverse, Database Management & Implementation, Scalable Architecture
- **Cloud & Systems:** AWS (Amazon Web Services), SharePoint, Microsoft Project Server
- **Tools & Workflow:** GitLab, GitHub, MS Project Professional, Milestones Professional, Power BI, Git
- **IDEs:** Visual Studio, VS Code, PyCharm, Eclipse, Android Studio
- **Design & Office:** Adobe Photoshop, Illustrator, MS Word, Excel, PowerPoint, Visual Studio MSDN, Google Docs/Slides
- **Soft Skills:** Problem-Solving, Collaboration, Adaptability, Delivering Results

EDUCATION

University of California, Merced
Merced, CA 08/2021 - 07/2023

Bachelor of Science

Computer Science and Engineering

- **Database Implementation:** Built a C++ SQL interpreter; optimized query performance through efficient catalog and aggregation design.
- **Capstone Project Lead (NUTSTAR):** Spearheaded development of a C# Windows Forms location app integrating Bluetooth data.

- **Security & Compliance:** Followed strict data security and access control protocols while developing and maintaining systems in a federal environment.
- **Mentorship & Learning:** Partnered with senior engineers and mentored interns, contributing to knowledge sharing while continuing to expand backend and system design skills.

University of California, Merced

Network Technician

08/2022 - 05/2023

- Optimized campus network systems and documented infrastructure, equipment, and troubleshooting processes.

University of California, Merced

Student Technology Consultant

08/2021 - 05/2022

- Delivered tech support to faculty, staff, and students, resolving hardware and software issues efficiently.

CERTIFICATIONS

- **AI Fluency**
- **Claude 101**
